

“The presentation on sports gambling was very helpful to us as counselors in training because it provided information that is not widely known and it will allow me to have that on my radar when working with clients that may be struggling with a gambling addiction.”

“I was not aware of the intensity and money deficits that can come from gambling on sports. When I begin my work in the counseling field, it will be important for me to recognize the behaviors covered in Tim’s presentation. These illegal activities seem to be more prominent than I realized.”

“I had no idea of the dangers that can come from sports gambling and the true addiction that can develop even from ‘harmless’ Super Bowl boards. Tim’s presentation was eye opening and will allow me to be aware of such patterned behaviors when working with clients. I also really appreciated the large poster examples as I was not familiar with the variety of sports gambling opportunities. Thanks!”
